

*"All good ideas
need a helping hand"*

MIDLANDS & WEST ENTERPRISE PROGRAMME

Do you have an innovative business idea?

The Midlands & West Enterprise Programme offers:

- Office Space with Broadband
- Opportunity to apply for Enterprise Ireland CORD funding
- Access to the facilities and resources of Galway-Mayo and Athlone Institutes of Technology
- Business strategy and planning
- Access to Industry Expertise
- Mentoring
- No participant fees

If you are a prospective entrepreneur with industry experience and an innovative business idea the MWEP will provide you with the business skills and support necessary to transform your idea into a successful business.

APPLICATIONS ARE NOW INVITED FOR THE NEXT MWEP COMMENCING IN JUNE 2011.

Application Form Available at www.gmit.ie/iibc/mwep.html

The Midlands & West Enterprise Programme is a seven month program that provides high potential entrepreneurs and innovative startups with the business skills, networks, facilities and supports necessary to navigate the business start-up process from concept to successful commercialisation. The MWEP is based in the Innovation in Business Centre at Galway-Mayo Institute of Technology and in the Midlands Innovation and Research Centre at Athlone Institute of Technology.

ACTIVE MIND

John Maguire Chief Executive Active Mind

With science and technology playing an increasing part in sport at all levels, the door is open for new business ideas that feed into this trend. imeeGOLF is a pioneering new approach to **improving your golf game**. Creating a completely new dimension in the golfing world, imeeGOLF doesn't just improve your game, it re-introduces golf as an **engaging, interactive sport** which allows for a golfer's physical game of golf to be merged with a digital representation of their game.

EMEDIA

Award winning medical media company, eMedia, launched their first iPhone App in October 2009. The product called Pocket Heart (the first 3D Medical Heart App for iPhone/iTouch) has been accepted by Apple and is up on the iTunes store.

Pocket Heart is the first product in a suite of 3D medical applications eMedia are developing for Apple's iPhones/iTouch mobile technology.

"Pocket Heart is a novel way to study and discover how the human heart works. Our unique interface gives you the opportunity of viewing the heart in 3D, enabling you to rotate, zoom and navigate through all of the important areas of the heart", explains Mark Campbell, company founder.
