

Update for all School of Engineering students re: September 2020

Dear students,

I am providing you with some information that you will need to plan your return to GMIT in September. We have planned a campus that is safe and comfortable to attend for classes in September.

For the academic session 2020/21, School of Engineering staff have designed the delivery of your course with two major objectives: that you can learn in safe conditions and that the essential tutorials and practical elements of your course are delivered on-campus. The remaining elements of your course will be moved to online delivery as per a weekly timetable to be made available to you in September.

You will be required to attend GMIT for one day during the week commencing September 21st for essential induction training. You will be notified of the exact date closer to September.

Term 1 starts on Monday, 28th September, 2020. You will be required to attend on-campus for the essential tutorials and the practical workshop and laboratory elements. The details for your course and stage for Term 1 are shown in the table below.

Students on the **BEng (Hons) Agricultural Engineering** programme, which now meets the requirements for Young Trained Farmer Status, will have to take additional modules in order to comply with Teagasc requirements. Some of these modules will be delivered in early September, May and June. These students will receive communication on this shortly.

We are looking forward to seeing you on campus in September.

Best wishes,

Gerard Mac Michael
Head of School - Engineering
